NPR RECEIVES THE JASPER QUALITY AWARD FOR 2013

NPR of America is honored to receive the 2013 Quality Award from Jasper Engines and Transmissions. Jasper has well over 1000 suppliers, and of these suppliers only 4 were given the Jasper Quality Award, NPR of America being one of them.

NPR was rated in the following areas:

- Percentage of parts that are on 100% inspection (IE. Lower number of parts on 100% inspection equate to higher Quality score)
- Warranty claims involving quality of parts
- The overall perception of quality by QC production involving quality of parts
- Response time on quality issues
- The number of Corrective Action Reports
- The Number of open Corrective Action Reports

Jasper is known to be one of the industry's leaders in aftermarket engine rebuilding, and NPR is honored to receive their Quality Award.

NPR leads the industry in the small, thin, steel rings, as seen on today's Domestic, Japanese, and European engines. NPR is an ISO certified, multinational company with manufacturing plants in North America, Asia and Europe. NPR designs and makes OE piston rings for American, Asian, and European brands. These are NPR's renowned thin metric rings the OEM engineers specify exclusively. NPR's aftermarket replacement rings are run on the same production lines and use the same materials and surface treatments as the rings we make for the car companies. NPR is OE for NPR is OE for Ford, GM, Chrysler, Honda, Nissan, Toyota, Mitsubishi, Kawasaki, Komatsu, Suzuki, Yamaha, and others.
